

CAREERS / PRODUCTION

CNC Operator

Set-up, operation and machine-side programming of 3-, 4-, 5- and 6-axis CNC machining centers for assigned production batches.

What you will do

- Set up and operate CNC machining centers for assigned production batches.
- Prepare tooling, carry out machine-side programming, and follow set-up sheets, technical drawings and work instructions.
- Monitor machining and perform in-process dimensional checks using appropriate measuring instruments.
- Identify deviations and work with Programming, Production and Quality when corrections are needed.

The profile we are looking for

- Experience in established machine shops setting up and operating CNC machining centers.
- Excellent ability to read and interpret mechanical drawings.
- Knowledge of tooling, cutting parameters and measuring instruments, including calipers and micrometers.
- Availability to work two shifts.
- A mechanical or technical diploma is preferred.
